State pension age age#	158,600

Notes

The estimated resident population of an area includes all people who usually live there, whatever their nationality. Members of HM and US Armed Forces in England & Wales are included on a residential basis wherever possible. HM Forces stationed outside England and Wales are not included. Students are taken to be resident at their term-time address.

#working age is 16 to state pension age. The state penstion age (SPA) for women will increase by six months each year (one month every two months) between April 2010 and March 2020. The age groupings displayed here reflect the SPA for women as of June 2010. Of the estimated population of females aged 60 on 30 June 2010, 85% are defined as SPA, and the remaining 15 per cent are defined as not SPA.
