Mid-2008 Population Estimates for 2010 Wards in England and Wales by Quinary Age and Sex, and Working Age

2010 Wards

In 2003 a new policy was introduced across National Statistics to minimise the statistical impact of frequent electoral ward boundary changes, particularly in England. Under this policy any changes to English or Welsh ward boundaries promulgated (laid down in statute) by the end of a calendar year will be implemented for statistical purposes on 1 April of the following year, irrespective of the year the actual change comes into operation. The wards resulting from this policy were known as 'statistical wards', and 2003 statistical wards, 2004 statistical wards and 2005 statistical wards were defined. For ward boundaries for 2006 onwards, the term statistical wards is no longer used. Wards for 2006 are known as '2006 wards' etc. 2010 wards are wards that were promulgated by 31 December 2009.

Notes

1. These figures are consistent with the published revised mid-2008 local authority estimates (May 2010), and the published revised mid-2008 Lower Layer Super Output Area population estimates (September 2010)
2. Whilst the estimates are produced down to unit level, it is not implied that the estimates are accurate to this level of detail. In addition there are limitations with the administrative data sources used to produce these estimates, which may impact on the quality of the estimates.
3. These estimates are neither experimental statistics or National Statistics. Feedback over the quality of these estimates is welcome (see contact details below).
